

# 1942 Hudson Super Six Station Wagon

Series 21 - 8 Passenger Body by Cantrell  
212 cid 102 bhp 121" w/b 3315 lbs.  
Sold for \$231,000 in 2007

Total 1942 Hudson Production: 40,661

One of only four known surviving 1942 Hudson Woodies, this example is the most accurate and true to original form. Mahogany body panels and ash framing. Optional electric overdrive, AM radio and turn signals.

The purpose of HETHS is:

- to **discover** the history of the Hudson Motor Car Company;
- to **locate** products, writings, newspapers, journals, technical data, photographs, and objects that relate to HMCC history;
- to **establish** a HMCC museum and library;
- to **promote** the education of the public on the HMCC history. Filling a need for those who have an interest in preserving HET history, heritage, and the automobiles produced and sold by the Hudson Motor Car Company since its inception in 1909, is an active goal of the HETHS.

Working closely with the HET Club, the HETHS regularly promotes Hudson related displays at various museums across the country.

All donations are **tax deductible** and further the Society goals. HETHS is eligible to receive tax-deductible donations of money, cars, literature, memorabilia and artwork.

You are invited to join us in the pursuit of history.
